THE CITY'S CRIME.

Haunts and Habits of the Violent.

Scenes of Real Life and Death.

Some Observations on the Criminal Classes—Criminality Inherited and Crime Compulsory—The Refuge of Drink.

Crime is a mystery to persons who have never taken the trouble to study its causes. To those who have penetrated the haunts of our petty criminals, the mystery is in a measure dispelled. A human being could not have been born with a black heart, and a criminal could not have been born with a white heart. Crime is a disease, and like all diseases, it is inherited and it is contagious. It is a disease which is not only inherited, but it is also contagious. It is a disease which is not only inherited, but it is also contagious. It is a disease which is not only inherited, but it is also contagious.

Crime is a disease, and like all diseases, it is inherited and it is contagious. It is a disease which is not only inherited, but it is also contagious. It is a disease which is not only inherited, but it is also contagious. It is a disease which is not only inherited, but it is also contagious.

THE CITY COUNCIL.

A New Effort to Get Light on the Gas Question—Effort to Equalize City Taxes.

The Council met last evening. Vice-President Temple in the chair. The water gas bill passed to its second reading and was referred to the committee of the whole. Mr. O'Malley introduced a resolution which, after stating that the time before the Municipal Assembly during its present session was too short for the proper consideration of the gas question, proposed a permanent joint committee to do the work. Mr. O'Malley's committee was to consist of three members of the Council and four of the House of Representatives. The committee was to have the duty of ascertaining the attainable information upon the subject, and to make plans for the best possible ordinance upon the subject. This committee, it was proposed, should be ready to report at the meeting in October. After some discussion the resolution was adopted. The only other part of the committee should consist of two members in each of the House and of three members in each of the Council. The resolution then passed after a clause in it, postponing any more gas ordinance until after the committee had reported, was stricken out.

The Committee on Sanitary Affairs, through Mr. Haines, reported the resolution of the House providing that chemists be appointed to examine the water and soil of the city, to examine into the chlorides matter. The report will be taken up this evening.

There was one more item of business. Mr. Seddon introduced a resolution to the effect that the City Council and the House of Representatives should have a joint committee to examine into the interests of the city, to the end that there should be no more gas ordinance until after the committee had reported, was stricken out.

The Committee on Sanitary Affairs, through Mr. Haines, reported the resolution of the House providing that chemists be appointed to examine the water and soil of the city, to examine into the chlorides matter. The report will be taken up this evening.
